

SECUREFLO – DEVOPS SECURITY SERVICES

FOCUS ON PEOPLE PROCESS & TECHNOLOGY

SecureFLO provides a service to companies looking to develop and manage DevOps security. We believe that developers require an understanding of how security affects the application development lifecycle. As they use methodologies like Agile and manage overall quality and efficiency it is important to look at standards like CSA, NIST, ISO to promote security within the overall process. We have experience working with large business and take security and compliance as a operational issue. We look to develop a defensible program that is based on standards and meets your business and regulatory requirements.

What does that mean?

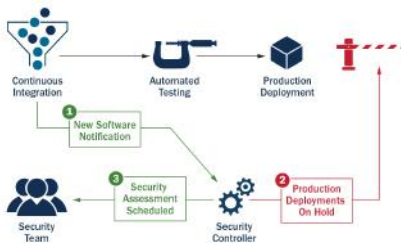

- Training and Awareness
- Good Governance
- Standards based security
- Risk Management
- Secure Operations
- Continuous Compliance
- Training and Awareness

SECURITY FOCUSED DEVELOPMENT OPERATIONS

SecureFLO DevOps security program is focused on all levels of your development process. SecureFLO works to help companies understand .

- Develop/build security tools and pcesses for scanning, testing, monitoring, and reporting
- Lead/Coach and mentor DevOPS teams from a Security perspective
- Conduct vulnerability and risk assssments to provide actionable remediation plans
- Develop Technical Security specifications for the targeted cloud applications/workloads
- Co-ordinaate security concerns with software teams across the company through a software guild

DEVOPS SECURITY SERVICES FROM SECUREFLO

DevOps + Security: DevSecOps

Information and/or Cyber Security is focused on Confidentiality, Integrity, and availability of data for business to function. The essential ingredients as mentioned before are people, process, and technology. Our Information security program is focused on defensible security approach that is based standards like NIST, ISO, CIS, etc. SecureFLO is unique in its approach to prevent, detect, and contain threats. We understand the cloud, IOT, ope source, blockchain are all part of the new economy that should be considered and managed.

Our focus is is to be your security partner in the DevOPs security process and develop best practices within the company as you build new solutions in the cloud.

Let us be your security practice.
