

# SECUREFLO'S DESKTOP AS A SERVICE (DAAS)

## The Desktop in the Cloud

Enterprises have reaped the benefits of moving their data centers to the Cloud.

With this revolutionary offering, SecureFLO enables them to further save costs by moving desktop computing—the remaining on-premise IT—to the Cloud, too.

The business case for migrating the desktop addresses the following:

- Reduce the IT hardware inventory located on-premise
- Switch to a subscription model for desktop hardware and productivity tools—the Office suite
- Reduce the attack surface for viruses, malware and ransomware.
- Stricter control of installed software to remain in license compliance
- Patching oversight

- Desktop backups as a measure of protection against hardware crashes, virus, malware and ransomware attacks
- Backup strategies tailored to the specific business function
- Assuring the restricted access to the sensitive information
- Protecting sensitive information from being copied onto removeable media.

## When Attentively Administered, Monitored

The SecureFLO Desktop in the Cloud solution lowers the total cost of ownership for desktop computing with concentrated security controls.

Significant features of this offering include:

- Access your desktop from anywhere, anytime with any browser—Chrome, Firefox.
- Added authentication security with a onetime password

- Data backup remote and on-premise
- Disaster recovery configurations to ensure that users do not experience any downtime due to system failures.
- Monitoring of user activity on the desktop
- Application inventory reporting
- Integrated Active Directory services
- Assure that desktop usage complies with the enterprise acceptable use policy
- Remote maintenance resulting in further cost reductions

## Is Brilliantly Cost-Effective and Secure

Cost savings have been proven with locating the enterprise data center in the Cloud. SecureFLO's Cloud desktop solution offering replicates the model for the enterprise desktop.

SecureFLO's laser-sharp focus on security integrates the monitoring of user activity to ensure that sensitive enterprise data is not being leaked. It protects against dangerous, malware laden payloads holding your enterprise data to ransom

Disaster recovery and business continuity today are focused on the data center. With this offering, SecureFLO brings this capability to the desktop as well, resulting in increased overall IT uptime.

So go ahead, and let SecureFLO untether your enterprise desktop, and move it to the Cloud. A shrunken IT budget is awaiting you.

On request, SecureFLO will provide you with an adoption approach and the associated cost structure.
